Subject: Alliance chamber rdc

I attended the meeting all day in anch for the alliance/state chamber/rdc.

It was supposed to be for their boards only but I didn't know that and they didn't have the _____ to ask me to leave. It was obviously a rigged situation. I talked to wayne stevens, head of the state chamber and he said they didn't meet afterward to take any action. However, RDC board did. I called their exec director Jason Brune today and he said they didn't take any action but would meet next week.

I am suggesting that you be prepared to respond to an announcement from them and I don't think it would hurt to point out the obvious connection with undue influence of the oil companies in their organizations. Something like "it is really sad to see how the oil companies have compromised even our trade associations to the point they are acting against the interests of Alaskans and their own members."

You guys are doing a good job and I believe the votes will be there for the bill. I mentioned it before but we will probably ask to amend the bill to allow for a plan amendment that improves the proposal and also an amendment that gives credit for having an agreement to process gas liquids in state. I have attached the language to this email.
